Transfer directly from Hamburg Airport to Asklepios Klinik Barmbek with the S-Bahn lines S1 or S11, Station “Rübenkamp”. Riding time approx. 10 min.

August 15 - 17, 2014
Hamburg / Wilsede
(Heidemuseum)
Dear Colleagues and friends,

It is an honor to invite you to the 6th International Forum of Liver Surgery that will take place on August 15th-17th 2014 at the “Heidemuseum” in Wilsede/Germany, located on the south border of Hamburg.

Our goal is to make this meeting an unforgettable one, combining our common hobby: all around the liver surgery. “Gasthaus Zum Heidemuseum” is located in the middle of this extraordinary world and is unique. (sheep) existing only in this area, unbelievable sunsets- and walking tours under the moonlight and much more. The atmosphere of a big city. Wilsede is the home of nature and offers long walking and bike tours, watching the “Heidschnucken” (German deer) in a very exceptional museum village called Wilsede - away from daily stress and all the street noise.

The Conference venue gives opportunity to enjoy the fantastic natural environment of the national park of the “Lüneburger Heide” in a very exceptional museum village called Wilsede - away from daily stress and all the street noise.

Pre-congress lecture, plenary sessions, update sessions, debates and free paper presentations - the topics will cover all hepatobiliary surgery areas.

This scientific meeting is presented by the “Japanese-German Society for the Study of Liver Surgery”, which has been established in 2010 and is a non-profit organisation.

Scientific program

Friday, august 14th 2014

09:00 am  registration Wilsede
09:30 am  opening

1. Session

09:00 am Laserablation & percutaneous therapies, tropical (Hiroaki Terajima)
09:30 am General aspects of non-resectable liver surgery (Hiroaki Terajima)
10:00 am Best practices in liver surgery (Hiroaki Terajima)
10:30 am Interventional radiology and imaging in the treatment of liver cancer (Hiroaki Terajima)
11:30 am Free paper presentations

Saturday, august 15th 2014

09:00 am 1. Session

Laparoscopic Surgery, Surgical Techniques, Tropical (Terajima, Hiroaki)
Standardization of a laparoscopic hepatic enucleation technique using pig-liver models
Long term results of liver resection in benign liver disease
Liver biopsy
Clinical impact of laparoscopic ultrasound on diagnosis and treatment of liver diseases (Terajima, Hiroaki)
Standardization of a hepatic-parenchymal resection with pre-coagulated liver parenchymal plane

Saturday, august 16th 2014

09:00 am 2. Session

Bibliothethical matters, hepatic (Takamaru, Kai)
Bibliothethical matters, surgical (Terajima, Hiroaki)
Standardization of a hepatic-parenchymal resection with pre-coagulated liver parenchymal plane
Long term results of liver resection in benign liver disease
Liver biopsy
Clinical impact of laparoscopic ultrasound on diagnosis and treatment of liver diseases (Terajima, Hiroaki)
Standardization of a hepatic-parenchymal resection with pre-coagulated liver parenchymal plane

Saturday, august 17th 2014

08:00 am registration
10:30 am 4. Session

Treatment & Surgical Aspects (Ku, Hiroaki)
Bibliothethical matters, hepatic (Takamaru, Kai)
Bibliothethical matters, surgical (Terajima, Hiroaki)
Standardization of a hepatic-parenchymal resection with pre-coagulated liver parenchymal plane

Sunday, august 17th 2014

12:00 pm lunch break
15:30 pm end of session
